

Ideation Phase

Brainstorm & Idea Prioritization

Brainstorm & Idea Prioritization Template

Ideas were generated around the selected business problem and grouped according to the stages of the Employee Laptop Request Management lifecycle that they improve.

Date	12 September 2026
Team ID	_____
Project Name	Employee Laptop Request Management System
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected problem statement: PS-1 – Employees need a centralized and controlled way to submit laptop requests with complete information, while IT and management need clear approval status, tracking and accountability.

Step-2: Brainstorm, Idea Listing and Grouping

Idea Group	Brainstormed Ideas	Purpose
Request Submission	Centralized Laptop Request Form; Record Producer as employee entry point; capture requester and request details	Replace email and verbal requests with a standardized digital process
Request Classification	Basic / Advance request type; Software Development / Personal Use / Other reason	Differentiate laptop needs and capture justification
Validation & Policy	Complete request information; one request per employee per year; duplicate-request check	Prevent duplicate requests and improve data consistency
Approval & Accountability	Manager reference; automatic manager approval request; approval/rejection handling	Ensure proper approval and accountability
Status & Tracking	Pending Approval / Approved / Rejected; request number and request date	Improve visibility for employees, IT and management
Automation & Communication	Flow Designer; approval notification; approval/rejection email to requester; post-approval IT notification	Reduce manual intervention and keep stakeholders informed
Security & Access	it_employee and it_manager roles; employee create/read/write; manager visibility	Enforce role-based access and protect request records

Step-3: Idea Prioritization

Priority	Idea	Impact	Effort	Decision
1	Centralized Laptop Request Form / Record Producer	High	Medium	Must have
2	One Request per Employee per Year	High	Medium	Must have
3	Manager Approval Workflow	High	Medium	Must have
4	Request Status Tracking	High	Low	Must have

Ideation Phase

Brainstorm & Idea Prioritization

	Idea	Impact	Effort	Decision
5	Email Notifications for Approval Outcome	High	Medium	Must have
6	Role-Based Access using it_employee / it_manager	High	Medium	Must have
7	Request Type and Reason Classification	High	Low	Must have
8	Duplicate Request Validation and Error Handling	High	Medium	Must have
9	Update Set Deployment, Validation and Testing	High	Medium	Must have

Prioritized solution direction: Build the solution around a centralized Record Producer and Laptop Request Form, enforce the one-request-per-year policy, then automate manager approval, status updates and email communication while applying role-based security and controlled update-set deployment.

Ideation Phase

Define the Problem Statements

Customer Problem Statement Template

The problem statements are written from the users' point of view and focus on the challenges that the Employee Laptop Request Management System is intended to address.

Date	12 September 2026
Team ID	_____
Project Name	Employee Laptop Request Management System
Maximum Marks	2 Marks

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Employee	submit a laptop request with complete employee, request type and reason details	manual emails and verbal requests can be incomplete, duplicated or difficult to track	there is no centralized and controlled request process	concerned about delays, duplicate requests and unclear status
PS-2	IT / Manager	review laptop requests and manage approval decisions with clear accountability	request information and approval status may not be consistently tracked	manual handling can reduce visibility and make follow-up difficult	concerned about incorrect approvals, duplicate requests and poor traceability

Project problem focus: Replace manual laptop-request processes with a centralized ServiceNow solution that captures complete request information, prevents duplicate requests within a year, automates manager approval, tracks status and provides role-based visibility.

Ideation Phase

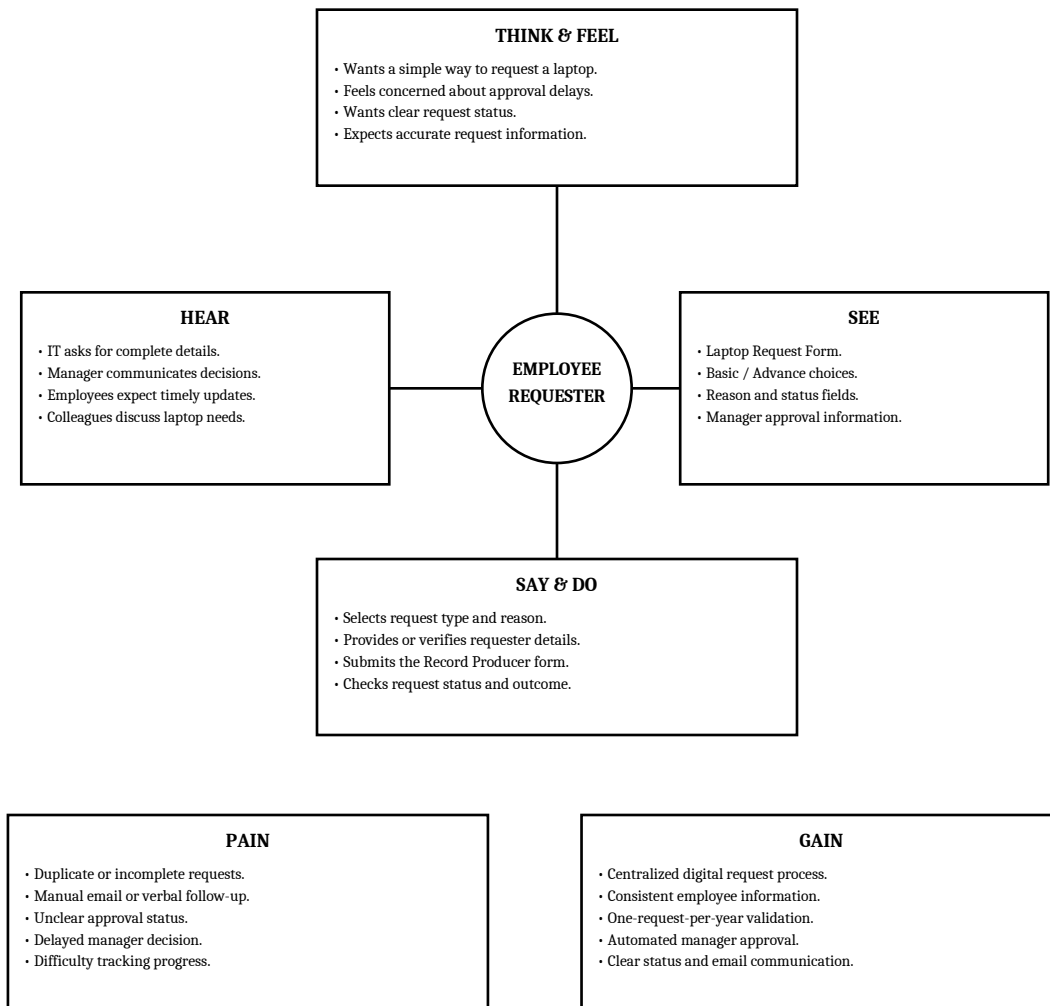

Empathize & Discover

Empathy Map Canvas

The empathy map below captures the needs, concerns, behaviours and expectations of the primary user involved in the Employee Laptop Request Management System: the Employee Requester.

Maximum Marks	4 Marks

Empathy Map - Employee Requester

Key insight: The Employee Requester needs a centralized and structured laptop-request process that makes submission simple, prevents duplicate requests, provides clear approval status and reduces manual follow-up.
